serves hemmed in by smoke and flames. They crawled along the light copper gutter at the edge of the roof until they reached a fire escape.

In less than fifteen minutes after the alarm had been given the student fire brigade had a stream of water playing on the building.

The quick and persistent work of the restudents, who relieved one another at frequent intervals, prevented the flames from reaching the physical laborators and two residences nearby, and kept the fire from that part of the cellar where was stored a cylinder of liquid chloring powerful enough to blow up the whole building.

The laboratory, a gift of the late Frederick F. Thompson, of New York, was built in 1892. It is the centre building in a trio of laboratories given by the wealthy alumnus and trustee of
